DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to a heat sensitive material comprising a polymer comprising at least one of three groups represented by formulae (1) to (3) (a printing plate comprising this heat sensitive material and the process of making an image on the printing plate), classified in class 430, subclasses 287.1 and 302.
 - II. Claims 11-20, drawn to heat sensitive material comprising a polymer comprising at least one of two structural units represented by formulae (4) and (5) (a printing plate comprising this heat sensitive material and the process of making an image on the printing plate), classified in class 430, subclasses 286.1 and 302.
2. The inventions are distinct, each from the other because of the following reasons:
 - a. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and they have different modes of operation and different functions. In the heat sensitive material of Group I, the crosslinking density in the hardened part is increased and unwanted penetration of developing solution can be effectively suppressed (page 4,

line 21 – page 5, line 13). In the heat sensitive material of Group II, no polymerization inhibition due to oxygen occurs (page 7, lines 8-24).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Robert Mukai on February 26, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
